### HOW TO DETERMINE HANDING OF YOUR DOOR:

- 1) View the door from the outside
- 2) The side that the hinges are on is the hand of the door

### EXAMPLE:

- Hinges on the left side, then the door is left-handed

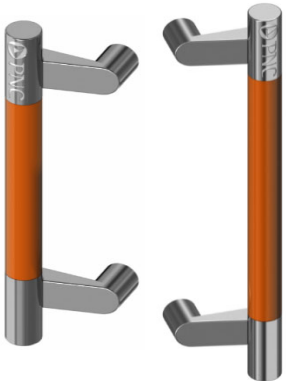

**NOTE:** All pulls are supplied standard with fasteners to accommodate a 1-3/4" thick door and mounting posts with center-to-center dimensions as indicated for each line item. You may need to drill new hole(s) to accommodate the posts of these pulls. Each pull comes standard with a retrofit kit that includes hole patches and a bolt cover. Interior push bars, additional retrofit kits and thick door fasteners are available to order.

***IF DOOR THICKNESS is different than 1 3/4" thick, enter door thickness here:***
